To Whom It May Concern:

I have recently learned that Churchill Heselton wants to put in a junkyard for cars on County Road near the old sawdust pile. I have owned and loved 138 County Road with its 87 acres of fields, woods, bog, and pond since 1980 and I am horrified to think that a junkyard would pollute the land, let alone reduce the value of my home. I have been in Bradford since 1965 and created a home here with my husband Howard that we never thought we would have when we first got married. We both came from New York City and discovered the joy of living in the country where we could live with nature and enjoy all that it had to offer. We brought up our children with this love of Bradford; in fact, they all worked on renovating the house at 138 County Road and we have all made it our own. Now they come up here to visit with their children. I think that a junkyard next to our home would be a horrible and dangerous thing. It would pollute the land and destroy our property value. I have signed a petition to stop the possibility of creating this terrible junkyard in our neighborhood.

Please do not allow any variances to be made to the zoning laws to allow a junkyard to be created here.

Thank you.

Yours,

Marion Klein
